

Crocheted Loving Joy Afghan Throw

Caron Simply Soft Yarn (6 oz / 315 yds)

Main Color (MC) - Ocean - 6 skeins

Contrasting Color - Off White - 5 skeins

Border Color - White - 1 skein

Hook Size - H/8 - 5.00 MM

Finished size approx 54" wide x 60" height (4.5 ft wide x 5 ft height) (Note - can alter finished size by altering number of beginning chain. The Caron Yarn creates a light weight, soft material which allows for comfortable warmth. You can use any yarn and hook size desired to create this afghan but the finished size will change accordingly.

One skein = 5½ inches height depending on how tight you make your stitches.

5 shades of embroidery yarn for Eternal Flame Symbol embroidered on Ocean swatch and attached to afghan. I created a swatch of Single Crochet using the main color "Ocean" to embroidery the symbol on, then used a slip stitch to attached the embroidered swatch within the bottom, first stripe, of a row of the Ocean color. You can attached the Eternal Flame swatch anywhere you desire, or you could create four such swatches to attach to the four corners of the afghan. You can fill in the entire color of the layers of simply create the outline of the each flame in the layers.

- 209 - shade violet - 12th chakra
- 799 - shade blue - 9th chakra
- 906 - shade green - 6th chakra
- 304 - shade red - 3rd chakra
- White - 12 zero

Stitches used to obtain size are Half Double Crochet, Single Crochet, and Shell stitch for border consisting of 4 Half Double Crochet in one stitch, Slip stitch. *(Note - I chose the Half Double Crochet stitch as the main stitch for this afghan because I see it as a "Divine Trinity" stitch. It is created by drawing up 3 loops on the hook and combining those three loops into "one" stitch. I see it as the process of "de-manifesting" the polarized energy of the ray of consciousness and returning to balance as "one whole" Source expression.)*

Instructions - YO = yarn over hook

Chain 201 stitches, In second chain from hook single crochet. Single crochet to complete row one. 200 stitches. *Chain 2, turn.

Double crochet in first stitch from hook. Continue from * throughout entire afghan. I prefer this method so as not to get larger holes at the beginning of rows. It creates a nice, even edge. If you keep the gauge rather loose instead of tight stitches the work will flow smoothly and still create a nice fabric that does not contain large holes.

One skein of MC and contrasting color = 18 rows per each color, alternating between MC and contrasting color to create wide stripes.

Border - Pure White - one row of Single Crochet around afghan, one row of Half Double Crochet Shell Stitch. This Shell stitch is created by crocheting four Half Double Crochet into same stitch, Slip Stitch in next stitch, skip one stitch, repeat around afghan. Tie off.

Half Double Crochet (US) is created by drawing up a loop (YO), insert hook into stitch, 3 loops on hook, YO and pull through all 3 loops.

Encryption

Main color "Ocean" represents earth hologram.

Contrasting color "Off White" represents the stepped down energy of Source mind humans can currently access, also the "perceived" image of the sun.

Border color "White" represents the pure, whole energy of Source mind, within which the earth hologram is co-created by human consciousness.

Eternal Flame - Colors used are based on the spectrum of energy/radiation of the local star mind humans can currently see as manifest light forms, as translated through the human auric brain. The Eternal Flame is a

"Ray of Consciousness" projected from the creation point of mind to anchor within a planetary shield, or "embodied" within a hologram. It is what humans call the auric body, but is a sphere of gradient layers of radiation of mind and operates as a brain, controlled by Source mind, as long as it remains connected to the creation point of Source mind. It is "within" the auric brain that the "personal" holographic reality field is created and experienced as "thoughts" are translated within the auric brain.

The Ray of Consciousness projected from the creation point of the Source Star Mind steps down as it expands and plugs into the zero 12 point layer of mind, which humans call the Solar Boundary. The step down sequence of the ray follows the Eternal Spiral sequence 12, 9, 6, 3, 12 zero. This creates "one" Eternal Flame at "four" different density levels of radiation, within the 12 zero point of mind, or the solar plane, or 4 different planetary shields (planets). The four different density expressions of the projected ray create the "personal identity" family line of consciousness embodied within one Star Mind. Each of the four identity expressions are "keyed" to the harmonics of the layer of mind they step down from (12, 9, 6, 3). This creates four different density Auric Brains within four different density planetary shields, surrounding the creation point of the Star Mind. Humans have created names to apply to the four different density expressions of the four different identity expressions as follows.

- Density Four - Highest in vibration - keyed to the 12 point layer of mind, extra large planet - Christed Identity. Balanced vibration name = GaRA. Fragmented pieces expressing as Uranus, Neptune and pluto.
- Density Three - Next step down in vibration - keyed to the 9 point layer of mind, large planet - Over Soul Identity. Balanced vibration name = AaRA. Fragmented pieces expressing as Jupiter and Saturn.
- Density Two - Next step down in vibration - keyed to the 6 point layer of mind, medium planet - Soul Identity. Balanced vibration name = TaRA. Fragmented pieces expressing as Earth and Mars (ascension system).
- Density One - Lowest in vibration - keyed to the 3 point layer of mind, medium planet - Incarnate Identity. This is the energy of the ray that fell in vibration to become human. Balanced vibration name = EaRA. Fragmented pieces expressing as Mercury and Venus.

Each of the four different density auric brains consist of five gradient layers of radiation of the layer of mind they are keyed to - 12, 9, 6, 3, 12 zero. These points are what humans call the vertical charkas, within the human expression. The auric brain/body is created "first" in the process of the projected ray of consciousness stepping down from the creation point of mind. The personal hologram is created, and experienced "inside" of the auric brain.

The layers of the auric brain are "brain waves", which are "polarized" waves of radiation, radiated from the vertical chakra points. Polarized simply means radiation that expands left and right of the vertical chakra points. This creates the experience of the ray of consciousness behind surrounded by spheres of radiation, which is what it means to be "embodied".

To embody as a ray of consciousness within this fragmented earth system, the embodying ray must step down energy of the 12 point chakra to animate the picture of the human body thought form. The human body thought form, and the manifest earth hologram, occur within the lowest vibration rate of the hologram, which is called layer 3 of the planetary shield, which humans call the troposphere. Doing so is the process of the ray of consciousness plugging into the picture of the human body thought form to turn on the thought of the human body thought form within the ray of consciousness.

Growing the human body thought form from a baby size to an adult size is the result of the ray of consciousness continuing to step energy of the 12 point chakra down into the 3 point chakra. To "ascend" or unplug from the human body thought requires the ray of consciousness to raise back up in vibration the energy stepped down to the 3 point layers. This called a 3 point accretion level. When the energy stepped down to animate the human body form is raised back up to the 3 point accretion level, the ray of consciousness automatically unplugs from the thought of the human body. This is what humans call death of the human body form.

This Loving Joy Afghan represents the earth life experience, stepping energy of the ray of consciousness down in vibration, then back up in vibration. It represents Source being embodied, and expressing as human within the earth ascension system. It is keyed with the love of Source to surround you and keep you warm and cozy. You can use it when desired, focusing on filling yourself with the love of Source, and imagine the afghan as the loving arms of Source surrounding you.

Source Loving Joy Blessings to All
